

“mouse”

Slider for quilt COVER

With its special design the “mouse” slider can be inserted on the top of the mounting device, leaving the sides free as visible in the picture. This way it is easier to apply the slider to the zipper chain or to a product which a zipper has been sewn.

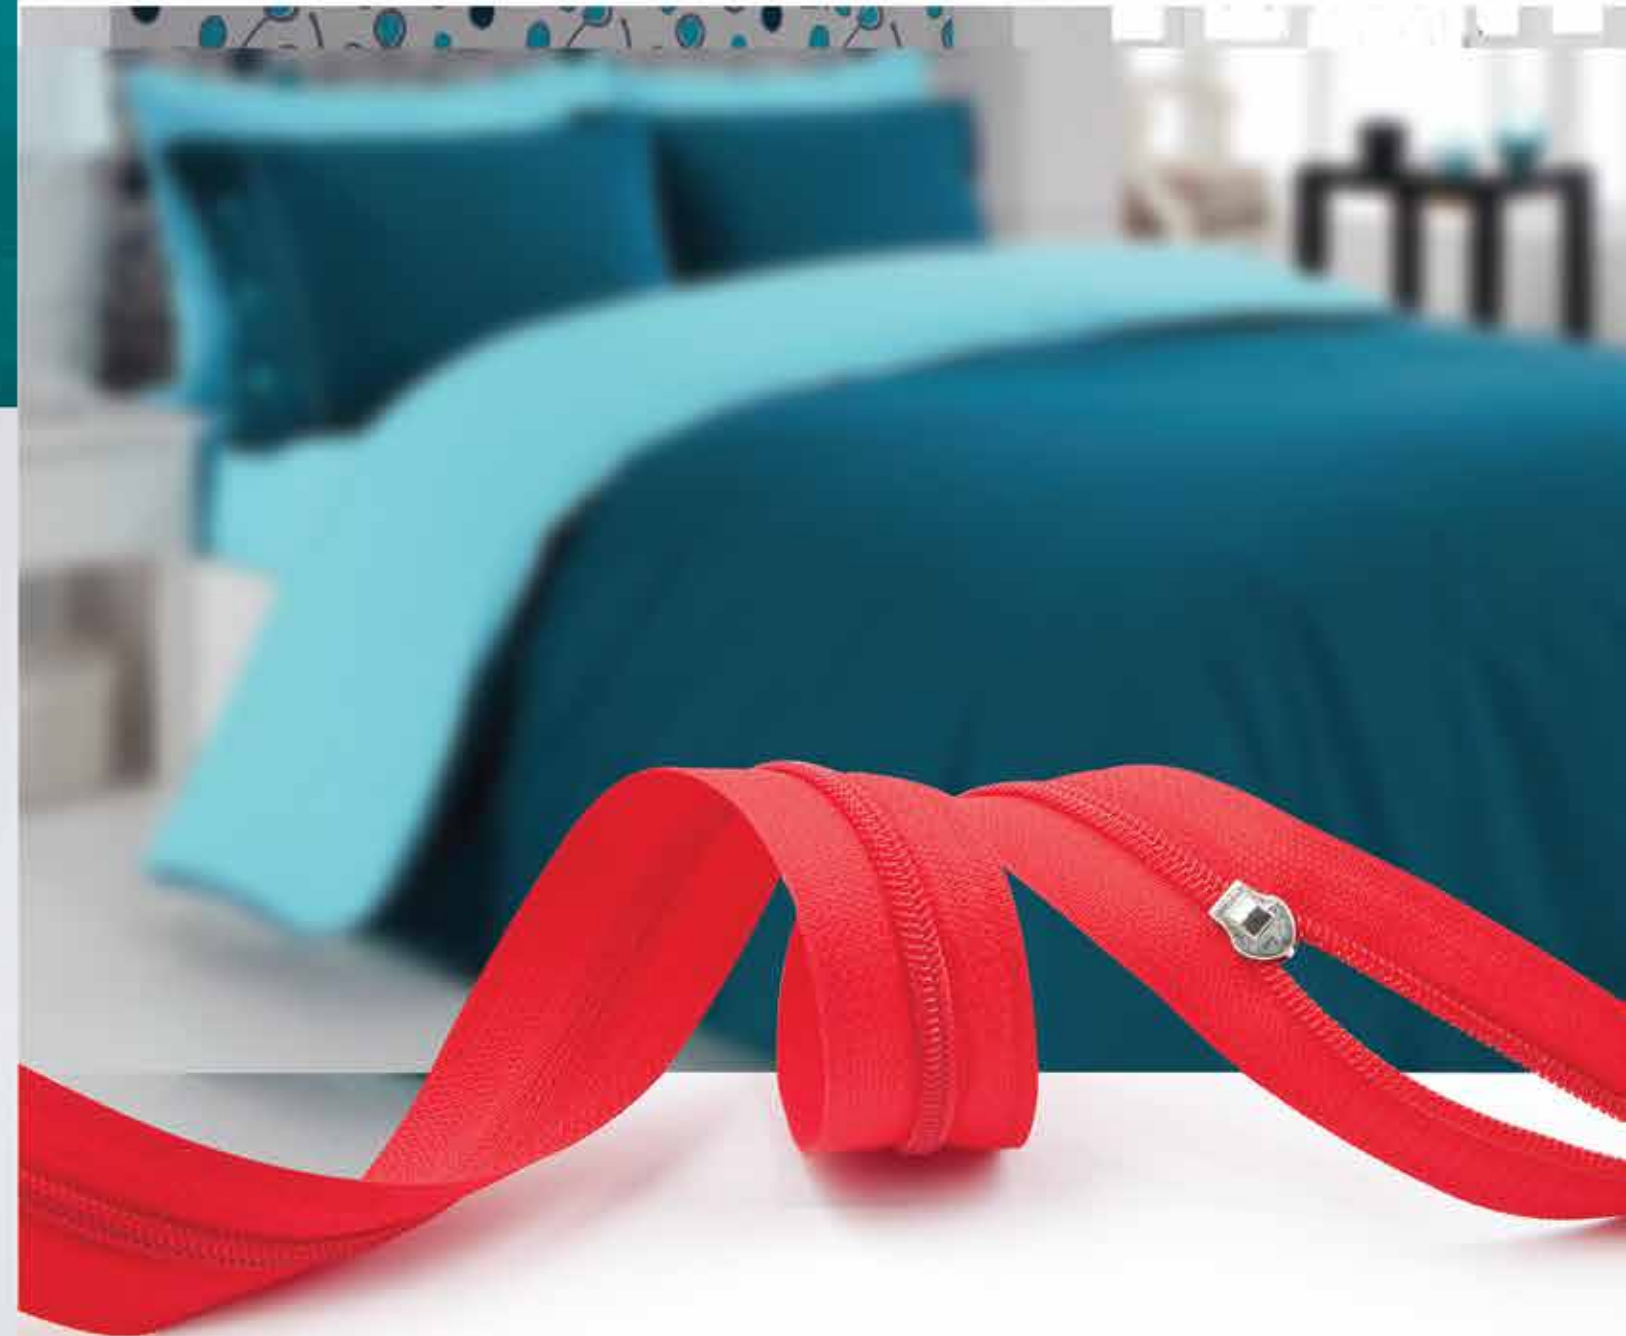

This product is protected by patent

With usual device once the slider is on the chain it can not be moved more than 3 cm. With the new device you can move the slider on the chain as you wish.
